INVESTMENT OBJECTIVE

The PCH Offshore Aggressive Portfolio is suitable for investors who wish to utilize their offshore allowance via an actively managed allocation of assets between equity, bonds, property and cash. The portfolio offers exposure to a wide range of currencies and offshore markets and ideal for investors who are prepared to accept a high level of volatility in seeking long term capital growth.

We invest in a combination of "best of breed" international unit trusts, blending the different skills and investment styles of fund managers. This approach has the ability to reduce volatility while achieving a growth rate in excess of inflation through different investment cycles.

The portfolio has a significant bias towards equities and over time, the effective equity exposure ranges between 60% and 95%. Market risk is high and you may experience negative returns over the short term.
